

**VALUE FINANCE**

# ABOUT US

Value Finance (VFT) and its affiliates are creating the ValueFi ecosystem. ValueFi is the issuer of the VFT token and the operator of the ValueFi ecosystem.

The Value Finance team has recognized the importance of interoperability between blockchains and, as such, is developing its products to transform and make the blockchain space more cohesive. Taking that need into account, its primary set of products includes a cross-chain bridge, a universal block explorer, and a multi-chain launchpad.

As the space continues to expand, the project plans to expand the ecosystem by creating its own venture capital (VC) fund and adding both a merch store as well as an NFT collection and marketplace. All of its services, products, and software tools are backed by the native token, VFT, which can be used for transactions or staked in the VFT-BNB liquidity pool.

The ValueFi team has been working behind the scenes relentlessly, offering consulting services and technical support to numerous projects. To solve challenges and help projects even further, the team decided to expand its goals and team to embark on a new journey.

A journey of commitment to the continuous development of the crypto industry, through the creation of needed blockchain tools and services, funding and advisory of new projects, and expansion into the metaverse and novel trends.

# PROBLEMS

Several of the blockchain-based projects we see today are built using the code of existing protocols. These “fork platforms”, as they are often called, are a copy of other platforms with a different design and negligible changes.

However, innovative protocols also face difficult challenges. Funding for new ventures may be hard to secure, especially during bear markets, and there is always the prevalent threat of cybercrime. Blockchain protocols, Decentralized Finance (DeFi) platforms in particular, oftentimes lose millions as they fall victim to hackers. This problem stems from a lack of expertise in the field of smart contract coding.

Current research demonstrates that we now have more blockchains operating than ever before. But, as previously stated, there is still a growing need for interconnectivity between blockchains, be it Ethereum Virtual Machine (EVM) compatible or not.

And finally, there is a need to bridge blockchain technology, including smart contracts and Decentralized Autonomous Organizations (DAOs), into the real world. Organizations in agriculture, real estate, supply chain, banking, healthcare, and numerous other industries can benefit from the implementation of blockchain. The needs of these companies, in terms of advisory and finding new partnerships, are vital to easing their transition into web 3.0.

VALUE FINANCE

# SOLUTIONS

ValueFi intends to offer various innovative services for users and tools to support the development of blockchain-based startups and the migration of existing businesses into web 3.0.

Backed by a team of expert developers and marketing specialists, ValueFi's main goal is to service the industry by solving the aforementioned problems and contribute to the growth, efficiency, and interoperability of decentralized technologies.

# MAJOR SERVICES VALUEFI

VALUE FINANCE

# VALUEFI MERCH STORE

ValueFinance will launch its own merchandise store, showcasing all of its software tools, decentralized applications (dApps), as well as VFT branded merchandising. New projects will find our products and packages incredibly useful for kickstarting their protocols.

Users paying with the ValueFi token will receive discounts on all purchases and a portion of sales from the merchandise store will be distributed among token holders.

VALUE FINANCE

# VALUEFI STAKE

A catalyst for ValueFi will be the deployment of its VFT Stake dApp. It has been developed to enable users to stake VFT, or any other supported third-party token, and receive rewards in the form of VFT and multiple other tokens.

Staking is available through a periodic lock-up feature that allows users to choose between a stake duration lock-up of 7 days, 1 month, or 3 months. The different lock-up periods guarantee APYs of 15%, 20%, and 25% respectively.

Also, the VFT stake dApp features a leaderboard and referral mechanism, which rewards users 0.1% for each referral. By incentivizing users to invite friends into the platform, ValueFi aims to expand its already established community.

VALUE FINANCE

# VALUEFI PAD

One of the core values of ValueFi is to serve as an incubator for blockchain-based startups. As such, creating a secure launchpad for new projects to receive funding and kickstart their development is one of the project's top priorities.

Beyond helping with funding, projects fundraising on the ValueFi launchpad will also receive privileged access to marketing and advisory services, as well as software tools that they can easily implement into their protocols.

The VFT is the cornerstone that will support all of ValueFinance's services. By staking VFT, token holders will be allowed to invest in promising projects at an early stage of development, where the growth potential is at its peak. Not only that but new projects will be required to own the VFT token to gain access to the toolset.

VALUE FINANCE

# VALUEFI CROSS-CHAIN BRIDGE

Adopting a blockchain-agnostic approach to the industry, ValueFi is designing a cross-chain bridge as one of its first products. The bridge will allow projects to migrate and share their tokens, as well as functionalities, between multiple chains. In doing so, projects can expand their reach and find new users on different ecosystems, such as Binance Smart Chain, Polygon, Ethereum, or Heco.

VALUE FINANCE

# VALUEFI MULTI-CHAIN SCAN

A multi-chain block explorer will be integrated within the ValueFi ecosystem, allowing the crypto community at large to verify the details and transaction history of the VFT token, and almost any coin/token, under a unified and easy-to-use interface.

In other words, ValueFi developers aim to build a block explorer that will provide basic information on all the prominent blockchains, including Ethereum (ETH), Binance Smart Chain (BSC), Polygon (MATIC), and Solana (SOL).

Portfolio tracking and other management tools, available across multiple chains, will also be added to further development stages.

VALUE FINANCE

# VALUEFI CAPITAL

Value Finance Capital will use its funds to invest in early-stage funding of other projects. Token holders will then receive a portion of the profits generated through the investment depending on their tier level, which is calculated based on the number of ValueFi tokens held in their wallets.

The community of token holders will also be able to vote and effectively decide which projects to invest in next. The funds from Value Finance Capital will also be diversified into real estate investments, a yield farming pool for the ValueFi token, and a systematic buyback of tokens to burn and increase the scarcity of ValueFi tokens.

VALUE FINANCE

# VALUEFI FINANCE CHARITY

Giving back to humanity is the most beautiful thing or step most of us need to do to save humanity from the ongoing epidemics and other kinds such as orphanages.

The world will be a better place if we simply understand that all hands are not equal. And being the voice of the voiceless is our mission in helping humanity through our value finance charity platform.

We also must work together with various reputable charities in fulfilling the goals of which our charity platform is created for. Also in our tokenomics a percentage has been marked out for charity development.

VALUE FINANCE

# PARTNERSHIPS

Currently we're still in development stages and believe with our concept we will have more partners. But our first partnership will be from AVNRich Pad as we look forward to raising funds on their platform.

# METaverse & GAME DEVELOPMENT

Metaverse (web3) has been the latest developments on blockchain even if the concept wasn't implemented recently as they've been platforms that already foreseen or developed on web3 such as Mana, TVK, axis's infinity and many GameFI projects.

We're always keen to adapt towards any latest innovations within the blockchain sphere in order to serve our project partners or have sources to provide for other platforms that develop on web3.

We will partner with game companies or as well hire more technical teams and artists to cohort with us in achieving this development. Our goal is to build a metaverse solid game for our token and also create revenue within the Merch store.

# NFT COLLECTION & NFT MARKETPLACE

ValueFi nft market place will be launched across all chains supported by the project, this marketplace will be suitable for nft producers, collectors and anyone interested in nft as well while supporting Minting, purchase and selling of nft across all chains in the most seamless way ever.

Also this will help with our metaverse game project by creating game components that can be traded on our NFT store. Those game components will also have advantages or can be utilised in our gaming system.

Further plans to explore Soulbound Tokens (SBT), and other NFT-related trends, will be added to the roadmap as the crypto space evolves. We'll create a wallet around SBTs and make them a part of our governance model by 2023.

VALUE FINANCE

# VALUEFI ROADMAP

## Q3 2022

- Value Merch Store (VMS)
- Development of ValueFi Pad
- Cross chain Development
- Multi-Chain Dapp Wallet
- Charity Site Development & Partners

## Q1/Q2 2022

- Community development
- Fundraising (Seed or AVN launchPad)
- Listing on pancake
- Fast track listing on CMC and CG
- Stake & Lending
- Cex listing
- ValueFi capital Investment Launch
- Ambassador program
- Multi-Chain Scan Dapp Beta

## Q4

- Background research and collection of information
- Gathering of personnel to lead the project
- General review of findings and Start of development

## Q4 2022.

- Metaverse - Value Finance research towards metaverse, partnering with metaverse related projects and product building together
- Metaverse game partnerships
- Development/testing and the launch of ValueFi NFT MarketPlace.
